

KERR LEGACY SOCIETY

Breathe New Hampshire's Dr. Robert B. Kerr Legacy Society is a group of thoughtful individuals who have included Breathe New Hampshire in their estate plans. This legacy society is named after our founder, Dr. Robert B. Kerr, who dedicated his life to lung health through his 50 years of service with this organization. Just like Dr. Kerr, members are helping to improve and save lives by eliminating lung disease.

As a member of the Dr. Robert B. Kerr Legacy Society, you may elect to keep your membership anonymous, or be included in the promotion of the Dr. Robert B. Kerr Legacy Society through materials such as newsletters and annual reports.. Our public acknowledgement allows us to recognize you and it provides a unique opportunity for your leadership to inspire others to learn more about how they can make a difference.

OUR MISSION

To eliminate lung disease and improve the quality of life for those living with lung disease in New Hampshire.

MAKE A GIFT THAT COSTS NOTHING DURING YOUR LIFETIME

Your commitment to lung health is not just an investment in the present but a legacy for the future. This brochure aims to highlight the critical importance of supporting lung health initiatives in New Hampshire through planned giving. By making a lasting contribution, you can help ensure that individuals in our communities have access to vital resources, research, and support for lung-related conditions.

Breathe New Hampshire is dedicated to advancing lung health through research, education, advocacy, and patient support. Our comprehensive approach addresses the diverse needs of individuals living with lung conditions while promoting awareness and prevention strategies to enhance public health.

By including Breathe New Hampshire in your estate plans, you can make a meaningful impact on lung health in New Hampshire. Planned gifts provide critical support for programs and initiatives that:

- **Support Education and Awareness:** Promoting public awareness campaigns, educational programs, and resources to prevent lung diseases and empower individuals to make healthy choices.
- **Enhance Patient Support Services:** Providing access to support services, patient advocacy, and resources to improve the quality of life for individuals living with lung conditions.
- **Advocate for Policy Change:** Supporting advocacy efforts to promote policies and regulations that protect lung health and reduce exposure to harmful pollutants and toxins.
- **Advance Research:** Funding research initiatives aimed at discovering new treatments, improving diagnosis methods, and ultimately finding cures for lung diseases.

There are several ways to include Breathe New Hampshire in your estate plans:

- **Bequests:** Designate Breathe New Hampshire as a beneficiary in your will or trust, specifying a certain amount or percentage of your estate.
- **Charitable Gift Annuities:** Establish a charitable gift annuity to provide you with fixed payments for life while supporting lung health initiatives.
- **Life Insurance Policies:** Name Breathe New Hampshire as a beneficiary of your life insurance policy or donate a policy you no longer need.
- **Retirement Accounts:** Designate Breathe New Hampshire as a beneficiary of your retirement account assets, such as IRAs or 401(k) plans.

Disclaimer: Information provided in this brochure is a general guide to planned giving strategies and how donors may maximize their support while respecting your current financial needs. We encourage you to consult with a lawyer or financial advisor to explore which opportunity might be best for you. No part of this booklet is intended as legal advice.

ABOUT US

Breathe New Hampshire is a well-established, 501(c)3 non-profit organization that has become an integral part of New Hampshire's public health landscape, focusing on critical issues related to lung health, such as tobacco use, COPD (chronic obstructive pulmonary disease), asthma, air quality and lung cancer. We provide educational programs, and support public health advocacy and scientific research focused on preventing, eliminating, and treating lung disease through the Mary Fuller Russell Research Fund.
