

VAPING UNVEILED™

This free program provides youth, teens, community members, parents and educators the opportunity to learn more about the impact of vaping, Juuling and nicotine addiction on youth, including the latest trends in NH. Learn why teen vaping and nicotine addiction is a public health concern and what you can do to help prevent it.

For more than 100 years, Breathe New Hampshire has been a public health nonprofit focused on critical issues related to lung health, such as tobacco use and preventing youth nicotine addiction, COPD (chronic obstructive pulmonary disease), asthma, air quality, and lung cancer. We provide educational programs, advocate for public health, and support scientific research to prevent, eliminate, and treat lung disease.
